Choosing your business printer has never been easier

Keep your office running smoothly by choosing a colour printer designed to support. This fastest in its class colour laser range combines all of your office needs in to a single cost-efficient device, with a host of features and functionalities aimed to support you in your day to day role.

The whole colour range benefits from a large 250 sheet paper tray meaning you can keep printing for longer. You can also save time and costs by choosing the high-yield cartridges for maximum productivity and lower cost per page.

Bring your documents to life in full colour while keeping energy usage down and operating sound levels low at 47dB - quieter than your daily office conversation.

With fastest in its class print speeds, cloud printing and NFC, this multi-function device offers best value across the range.

² Optional Download

³ All available with the supplied software

⁴ Must be web connected

⁵ Calculated with 80gsm in a temperate, non humid environment

⁶ ISO print speed based on ISO/IEC 24734 (after first set of ISO test pages)

⁷ The recommended range of monthly printed pages to achieve the best possible performance and printer life. Printers are intended to handle occasional usage beyond the range with little or no effect. Consistently printing above the recommended print volume, however, may adversely affect the print quality or life of the machine. It is always best to choose a printer with an appropriate recommended print volume to allow for any anticipated increase in printing needs

⁸ ISO copy speed is based on

ISO/IEC 24735

Working with you for a better environment

Brother Australia has made a commitment to sustainability, as defined in the Brother Group Global Charter.

Through its Corporate Social Responsibility programs, Brother helps society achieve sustainable development by positively and continuously considering the environmental impact of all aspects of business operations.

Concern for the environment is the cornerstone of all operations and environmental impact is a prime consideration at every stage of our product's life cycle; from design, development, manufacturing, customer usage, and disposal, to reuse and recycling.
